### PROFESSIONAL PROFILE

---

Dr. Candace Doepker is Senior Vice President of ToxStrategies' Food and Consumer Products practice, as well as a Principal Scientist, and she is based in the Cincinnati, Ohio, area. She was trained in the field of cytogenetic toxicology and has 20 years' experience providing toxicological and scientific issues management support for many different multi-billion-dollar food, health, beauty and oral care brands. Relevant to the food industry, Dr. Doepker spent 16 years working for multibillion-dollar industries, helping to ensure consumer safety, worker safety, and general product stewardship in all of the following categories: coffee, snack foods, jams, jellies, baking mixes, juices, peanut butter, flavors, and oils. Recently, she has developed a strong working knowledge of the Food Safety Modernization Act and is experienced in facilitating discussions with multi-disciplinary teams to prepare for its implementation. Additionally, she has helped to evaluate risk and guide the strategic direction of companies involved with topics such as actives in drug products, caffeine, California Proposition 65 regulations, heat-formed toxicants, nuisance dusts, workplace allergens, and carbon monoxide.

Dr. Doepker is recognized in the food industry for her strong working knowledge of diacetyl and workplace flavor safety. Dr. Doepker has served multiple years as the Chairwoman of the Caffeine and Food Ingredients Committee of the International Food Information Council, as well as serving on the Council's Board of Directors. She has been on the Scientific Advisory Board of the National Coffee Association for 5 years and has been an active member of both the Grocery Manufacturers Association and International Life Science Institute's science and regulatory committees.

Specifically related to experience with the Generally Recognized as Safe (GRAS) process, Dr. Doepker has participated on a GRAS expert panel. In addition, she has helped over the past four years to prepare numerous dossiers, both for notification to the FDA and for self-GRAS without formal notification. She has helped as part of a multi-disciplinary team to facilitate and guide clients through the process successfully.

As a consultant, Dr. Doepker has become familiar with the FEMA-GRAS process, and is currently helping clients in the pet food and animal feed industry navigate the pilot GRAS program at the FDA's Center for Veterinary Medicine (CVM), as well as helping trade associations to consider future direction options.

## EDUCATION AND DEGREES EARNED

---

- 1995 Ph.D., Toxicology, Department of Environmental Health, University of Cincinnati  
1990 B.S., Biology, Xavier University, Cincinnati, OH (*cum laude*)

## PROFESSIONAL ASSOCIATIONS

---

Grocery Manufacturers Association, co-founder, Diacetyl Workplace Environment Exposure sub-committee  
International Food Information Council, Chair, Caffeine Committee  
International Food Information Council, Co-chair, Food Ingredients Committee  
National Coffee Association, Active Member, Scientific Advisory Group

## SELECTED PROFESSIONAL EXPERIENCE

---

### *Product Safety & Scientific Affairs Management*

Helped to facilitate implementation of Food Safety Modernization Act compliance measures at a \$4.5B food company.

Established a Product Safety & Scientific Affairs Section that could support a \$1.6B stand-alone coffee company.

Responsible for identifying, understanding, and prioritizing risks (perceived or real) associated with coffee manufacturing and consumption.

Led a Diacetyl Assessment Team, which effort had multimillion-dollar cost avoidance implications.

Used toxicology mastery and leadership/collaboration skills to help guide Government Relations' and trade associations' strategic direction related to legislative/ regulatory activities at state and federal levels.

Monitored FDA and OSHA regulations relevant to food manufacturing, and provided simplified explanations of complex regulatory language, as well as strategic guidance, to brand managers.

Monitored and developed strategies for addressing proposed regulations related to flavor and food safety.

Developed safety programs for marketing clearance of new beauty care, oral care, personal health care, and snack and coffee products.

## MANUSCRIPTS
